20

## What is Claimed is:

- 1. A system, adapted for use with a distributed data delivery network, for duplicating data being distributed in the network, comprising:
- a data storage; and

5

a data distributor, adapted to distribute data as streaming data at a first bitrate to at least one data server in the network, while writing said data to said data storage at substantially said first bitrate.

10 2. A system as claimed in claim 1, wherein:

said data distributor comprises an encoder, adapted to encode said data to create said streaming data at said first bitrate.

- 3. A system as claimed in claim 1, wherein:
- said data storage includes a disk, and said data distributor is adapted to write said data to said disk at substantially said first bitrate.
  - 4. A system as claimed in claim 1, wherein: said data storage is disposed at a data server in said network.
  - 5. A system as claimed in claim 1, wherein: said data storage is disposed at one of said at least one data server in said network.
  - 6. A system as claimed in claim 1, further comprising:
- a reader, adapted to read said data stored at said data storage at a read rate substantially equal to said first bitrate.
  - 7. A method for duplicating data being distributed in a distributed data delivery network, comprising:
- distributing data as streaming data at a first bitrate to at least one data server in the network; and

15

writing said data to a data storage at substantially said first bitrate while performing said distributing step.

- 8. A method as claimed in claim 7, wherein:
- said data distributing step includes encoding said data to create said streaming data at said first bitrate.
  - 9. A method as claimed in claim 7, wherein:

said data storage includes a disk; and

- said data distributing step includes writing said data to said disk at substantially said first bitrate.
  - 10. A method as claimed in claim 7, wherein: said data storage is disposed at a data server in said network; and said writing step writes said data to said data storage disposed at said data server.
  - 11. A method as claimed in claim 7, wherein: said data storage is disposed at one of said at least one data server in said network; and
- said writing step writes said data to said data storage disposed at said one of said at least one data server.
  - 12. A method as claimed in claim 7, further comprising:

reading said data stored at said data storage at a read rate substantially equal to said first bitrate.
